Horisontal form

Safe zone between our logo and other elemets/logos

04

Our brand's colors are inspired by our characters

We can pair these colors in these particular ways, so we achieve maximum contrast

For HEADLINES and important sentences

Fredoka One

This font has only one style and it has only English letters For other cases

Open Sans **Open Sans Open Sans Open Sans Open Sans Open Sans Open Sans Open Sans**

Which is compensated with a huge variety of styles within Open Sans

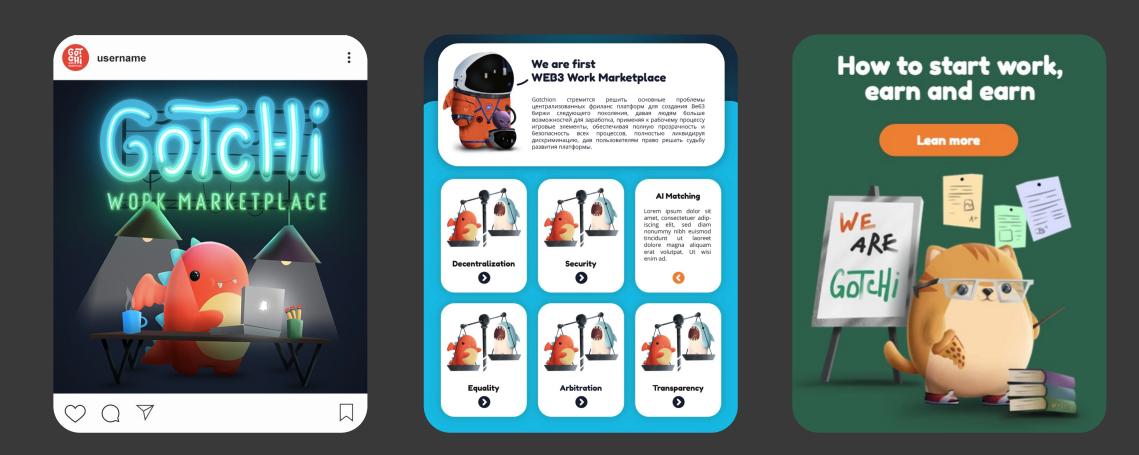

To compliment our characters, fonts and colors we use noise effect to give it more stylized look and also we round all the corners, so it matches our cute vibe.

We also use some white or colored Glow to highlight key elements.

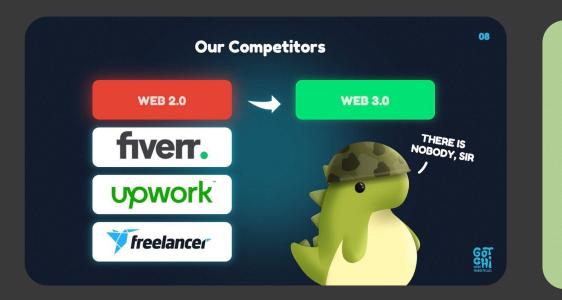

08

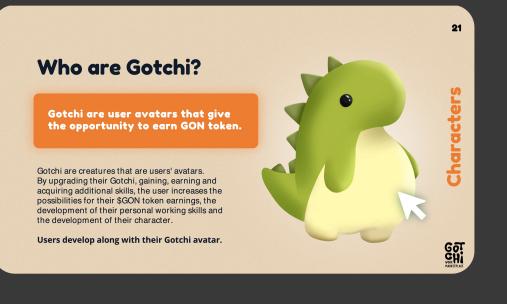

We can use neon to spice up our visuals and we also heavily use our characters and different staff drawn in their style and aesthetics.

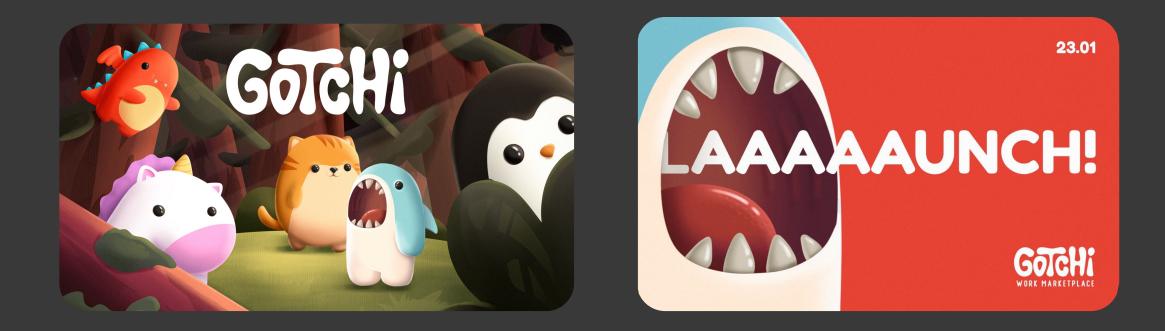

We always try to use our characters as an advantage and blend them with text and some bright and stylish background colors.

Its also better to show something with our drawn icons than writing a long text about it whenever possible.

THANK YOU FOR YOUR ATTENTION!
